Profile Summary

- Hands-on experience working with AEM Sites and core Web Content Management (WCM) features.
- Exposure to AEM as a Cloud Service architecture, including immutable deployments, separation of author and publish, and CI/CD concepts.
- Experience developing AEM components, templates, and dialogs using HTL (Sightly) and Sling Models.
- Familiar with AEM Core Components and component customization.
- Worked with Digital Asset Management (DAM) for managing and publishing images and documents.
- Understanding of JCR / CRX structure and content storage using Apache Sling.
- Basic experience with OSGi services, configurations, and bundle deployment.
- Exposure to Multi-Site Manager (MSM) concepts such as Live Copy and language copies.
- Experience with AEM authoring activities including page creation, content updates, and publishing workflows.
- Hands-on knowledge of HTML, CSS, JavaScript, jQuery, JSON, and Bootstrap for front-end integration.
- Basic Java knowledge with experience supporting backend logic for AEM components.

Technical Skills

Languages: Java/Java8Features. AEM 6.5, CRXDE, DAM, WCM, CRX, JCR, HTL (Sightly), Workflow, Dialogs, OSGi, Sling Model, SlingServlet, MSM, Content Fragment/Experience Fragment.

Web Development: HTML5, CSS3, JavaScript, Servlet, JSP and JSTL

Database Management: MySQL, JDBC.

Application Servers: Apache Tomcat.

Testing: JUnit.

Integrated Development Environment: Eclipse/Visual Studio, Postman, IntelliJ, Basics of git/github.

Projects

Project: Employee Management System

Technologies Used: Java, JDBC, SpringMVC, Hibernate7.0.0, JSP, JSTL, Servlet, MySQL 8.3.0, HTML/CSS, Apache Tomcat.

Description:

- The Employee Management System is a web-based application developed using Java, JSP, Servlets, Hibernate, and MySQL. It provides a centralized platform for managing employee details, including adding new employees, updating records, viewing employee lists, and deleting profiles. The system implements role-based access for admin and employees, ensuring secure authentication and session handling. It follows an MVC architecture, uses DAO and Entity layers for database operations, and supports CRUD functionality for employee records. This project helped in improving efficiency by automating manual employee record-keeping processes.

Project: Corporate Marketing Website Development on Adobe Experience Manager**Description:**

- Developed and supported a corporate marketing website using Adobe Experience Manager (AEM 6.5) with exposure to AEM as a Cloud Service concepts and best practices. Actively involved in building reusable and configurable AEM components using HTL (Sightly) and Sling Models to ensure scalability and ease of authoring.
- Worked with AEM Core Components to customize layouts and functionality based on business requirements, and implemented client-side libraries for integrating HTML, CSS, and JavaScript. Managed digital assets using AEM Digital Asset Management (DAM), including asset upload, metadata handling, and asset usage on pages.
- Supported content authors with page creation, content updates, and publishing workflows, ensuring content consistency and quality across the site. Utilized JCR / CRXDE Lite to understand content structures, assist in configuration updates, and troubleshoot content-related issues.

Education

- **B.tech (Bachelor of Technology) in Mechanical Engineering** 7.4/10GPA 2021–2024
Bapatla Engineering College, Bapatla, Andhra Pradesh.
- **Diploma** 73% 2019–2021
Bapatla Polytechnic College, Bapatla, Andhra Pradesh.
- **Secondary School of Education** 8.8/10GPA 2017–2018
Scholars International School, Piduguralla, Andhra Pradesh.

Certification

- Java Full Stack Development 2024
- Adobe Experience Manager (AEM), Udemy 2025

Declaration

I hereby declare that the above mentioned information is true to the best of my knowledge and I bear the responsibility for the given information.
