PROFESSIONAL SUMMARY

Software Engineer with 2.5 years of experience specializing in the React/TypeScript ecosystem and mobile-responsive design. Leveraging expertise in full-stack integration and product analytics to deliver scalable, high-performance web applications.

WORK EXPERIENCE

● **Minnik IT Solutions — Software Engineer** Dec 2024 - present

Mqsala (Laundry Management Platform):

- Developed a highly adaptive, mobile-responsive UI using a mobile-first approach, ensuring a seamless booking experience across smartphones, tablets, and desktops.
- Integrated Mixpanel to track user journey funnels, identifying drop-off points in the laundry scheduling process and providing data to improve conversion rates.
- Optimized order tracking modules using React Hooks and automated real-time status updates.

Spark Forty (E-commerce Platform):

- Engineered a fluid, responsive frontend designed to fit any screen size, maintaining high visual fidelity and performance on both low-end and flagship devices.
- Implemented Mixpanel tracking for e-commerce events to analyze customer behavior and preferences.
- Collaborated on backend integration with NestJS to manage dynamic product catalogs and secure checkouts.

● **Neyaa Tek — Software Engineer** Nov 2023 - Nov 2024

Raffleraa(Online Lottery Platform):

- Led the development of a real-time lottery platform, ensuring the interface remained stable and responsive during high-traffic live draws.
- Designed and implemented a fully responsive grid system, ensuring that ticket purchase modules and live countdowns fit perfectly on all mobile and desktop browsers
- Integrated REST APIs via Axios for real-time draw data and secure user transactions.

EDUCATION

2020 - 2022 Master of Computer Applications at **JNTUK** (CGPA: 7.5/10)
2017 - 2020 Bachelor's Degree at **AKNU** (CGPA: 6.7/10)

SKILLS

Frontend : React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3.
Backend : NestJS, RESTful APIs.
Database : MongoDB.
Analytics: Mixpanel (User Tracking, Funnel Analysis).
State Management : Redux, Context API.
Tools : Git, GitHub, VS Code.
