PROFESSIONAL SUMMARY:

Seeking a responsible and challenging position in a growth-oriented organization where I can apply and enhance my technical skills. Eager to continuously expand my knowledge and strengthen my professional capabilities. Focused on continuous learning and achieving result-oriented professional growth in the technology domain.

AREAS OF EXPERTISE:

- HTML5
- CSS3
- JavaScript
- React.js
- MongoDB
- TypeScript (Basics)
- VS Code
- GitHub

PROFESSIONAL EXPERIENCE:

Teens Software Solutions

Web Developer Intern | July, 2025 - Present

- Developed responsive and user-friendly web applications for multiple screen sizes
- Created reusable frontend components to improve consistency and maintainability
- Integrated frontend interfaces with backend services using APIs
- Collaborated in an Agile development environment using Git/GitHub

RELEVANT PROJECTS:

Weather Application

- The weather app was developed using HTML, CSS and JavaScript for the front-end, with data obtained from the OpenWeather API.
- User data, such as favorite cities, is stored persistently using LocalStorage.
- Developed a responsive weather application that allows users to search for current weather by city.
- Enabled the direct addition of cities to the favorites list on the weather display page

Role-Based Task Management Web Application

- Developed a responsive web application to manage tasks and user workflows
- Created reusable components to ensure consistency and maintainability
- Integrated frontend interfaces with backend APIs for dynamic data handling
- Ensured cross-browser compatibility and smooth user experience

EDUCATION:

Bachelor of Technology in Electronics and Communication Engineering 2020-2024

Bapatla Women's Engineering College

CGPA: 7.9
