PROJECTS

Auxeron Energies Construction

Live: <https://auxeronenergies.com>

Technologies: HTML, CSS, JavaScript, Bootstrap

◇ [Project Description](#)

Developed a responsive frontend website for **Auxeron Energies Construction**, a company focused on energy solutions and construction services. The website presents company services, project categories, and business information with a clean, professional, and modern UI.

◆ **Key Responsibilities & Achievements**

- Designed and developed a **responsive frontend interface** for an energy and construction business.

- Created **mobile-first layouts** ensuring smooth performance on all screen sizes. □ Built reusable UI components such as cards, buttons, service blocks, and grids.
- Improved **user experience** through clean layouts, proper alignment, and consistent typography.
- Ensured **cross-browser compatibility** and optimized frontend performance.
- Followed modern **UI/UX best practices** for corporate and construction websites.

Amma Organic Foods

Live: <https://ammaorganicfoods.com>

Technologies: HTML, CSS, JavaScript, Bootstrap

◇ Project Description

Developed a responsive frontend website for **Amma Organic Foods**, an organic food brand focused on promoting natural, chemical-free food products. The website highlights product categories, brand values, and customer-friendly navigation with a clean and modern UI.

◇ Key Responsibilities & Achievements

- Designed and developed a **responsive and user-friendly UI** for an organic food business.
- Created **product listing sections** for organic food categories (grains, dairy, vegetables, beverages, etc.).
- Implemented **mobile-first design** to ensure smooth browsing on all devices.
- Used clean layouts, proper spacing, and typography for better readability.
- Built reusable UI components such as cards, buttons, and sections.
- Ensured **cross-browser compatibility** and consistent design.
- Optimized frontend performance and page structure.

SK Groups

Technologies: HTML, CSS, JavaScript, Bootstrap

♦ **Project Description**

Developed a responsive frontend web application for **SK Groups**, a real estate-focused business platform showcasing multiple business verticals such as Real Estate, Infrastructure, IT, Agriculture, Finance, Manufacturing, and more.

• Key Responsibilities & Achievements

- Designed and developed a **modern, responsive UI** for a real estate business platform.
- Implemented **category-based sections** (Real Estate, Infrastructure, IT, Finance, Food Industry, etc.) with clean card-based layouts.
- Built **mobile-first responsive pages** ensuring smooth experience across devices.
- Created reusable UI components (buttons, cards, grids) for consistency.
- Improved **user navigation and readability** using proper spacing, typography, and layout alignment.
- Followed **UI/UX best practices** for business listing and service showcase pages.
- Optimized frontend performance and ensured cross-browser compatibility.

STRENGTHS

- Strong understanding of responsive web design
- Good knowledge of HTML5 and modern CSS practices
- Ability to debug UI issues and improve usability
- Experience building real-world frontend projects
